Description/Profile

Drives & Controls is the magazine that readers turn to for news and information on motion control, automation, and mechanical power transmission. This magazine provides comprehensive coverage of related subjects such as machine safety, industrial communications, hydraulics, pneumatics, sensors, and much more.

Drives & Controls is widely regarded as the leading publication in the motion control and automation market. It reports not only on UK developments, but also on news from the global automation industry. As well as the wide ranging news coverage in their printed editions, they also carry the latest news on their Website:

www.drivesncontrols.com

In the engineering design market, Drives & Controls has the largest number of requests from individual readers wanting to subscribe. Drives & Controls is the UK's No.1 engineering design magazine, both for its quality circulation and its editorial content.
